

Achieving Responsible AI with SAFe Micro-Credential

A photograph of a person's hands interacting with a laptop keyboard. Overlaid on the image is a futuristic, semi-transparent interface. It features a central, glowing blue brain-like network with nodes and connections. A hand is shown pointing towards the right side of the brain. Surrounding the brain are various data visualization elements: several small blue document icons connected by lines, a circular progress bar at the top right, and two circular charts labeled "50%" on the right. The overall theme is the intersection of human interaction with advanced AI and data.

**Maximize innovation, minimize risk with
Achieving Responsible AI**

Achieving Responsible AI is designed to equip Agile professionals with the skills to implement Responsible AI in their organizations. This course is a blended learning experience that combines a one-hour self-paced eLearning module with a half-day facilitated session

focused on practical applications and real-world scenarios. Participants will learn to identify key stakeholders, evaluate RAI policies, draft Epic hypothesis statements, and create actionable plans for continuous improvement in Responsible AI practices.

Achieving Responsible AI with SAFe Micro-Credential

Micro-Credential Description

Achieving Responsible AI will make you stand out as a leader in implementing responsible AI by providing hands-on experience and practical skills that ensure your AI projects are transparent, accountable, and aligned with human values. Through immersive learning and practical activities, you'll develop the capability to ensure your AI systems are fair, transparent, and accountable.

Micro-Credential Details

Duration: 5 hours

Required Pre-work: A self-directed e-learning that must be completed before the live session

Facilitated Session: A live, hands-on session facilitated by experts designed to help you put into practice what you learned in the e-learning

Assessment: Participants are assessed throughout the learning via knowledge checks and activities

Achievement: Earn a SAFe Micro-credential achievement upon completion

Target audience: SPCs, RTEs, Agile Coaches, or anyone preparing to facilitate the Value Stream Mapping Workshop

Key Attendee Benefits

- Hear expert guidance live and engage with concepts through hands-on, interactive exercises to improve mastery of new skills
- Earn a recognized SAFe micro-credential badge and show proven competency
- Be prepared to run the Value Stream Workshop and equip teams to identify and manage their value streams effectively
- Learn valuable skills to grow your impact in an Agile organization
