

COURSE BROCHURE · VERSION 2026

Certified AI Product Manager

Ship a working app in two days

2 days

LIVE ONLINE

10 hrs

PDUS

Included

COURSEWARE

\$400

PER SEAT

NEW IN THIS RELEASE

You ship, not sketch

The deliverable is a deployed application with a link, not a slide deck or a canvas.

Real product calls

Module 6 covers the decisions you only face once something is actually running.

It changes how you spec

The final module is about prototyping before writing requirements, back at work.

INSIDE THIS BROCHURE

Contents

01	Program overview & what's included	3
02	Why this certification, now	4
03	Delivery mode & prerequisites	4
04	What you'll be able to do	5
05	Who should attend	5
06	Course curriculum	6
07	AI in this course	7
08	Your instructors & how to enroll	8

AT A GLANCE

Course version	2026
Format	Live online
Duration	2 days · 10 hours
Credits	10 PDUs
Assessment	Certification exam
Credential	Certified AI Product Manager™, issued through Accredible
Prerequisites	None
Investment	\$400 \$800

Training a team?

20% off any group of five or more, plus private cohorts scheduled around your PI calendar. Email d.stevenson@agile36.com.

★★★★★ 4.9 / 5

Rated by learners on Google. Agile36 has trained professionals at Fortune 100 and Fortune 500 companies, government agencies, and universities for more than a decade.

WHAT CHANGED IN VERSION 2026

Building over theory

Eight modules, and six of them have you building rather than discussing.

AI where it earns its place

Module 4 is explicit that AI goes in where it improves the product, not everywhere.

Deploy on day two

The app goes live in the session, and you demo it from a shareable link.

01 · PROGRAM OVERVIEW

Stop specifying products. Build one

Two days that take a single idea from a blank page to a deployed application. You scope it down to something finishable, stand up the first working version, add data and authentication, put AI where it genuinely helps, and deploy it live.

The last three modules are the ones product people remember: the calls you only make with a running build in front of you, demoing something real, and changing how you brief engineering once you have built a thing yourself.

THE AGILE36 DIFFERENCE

Most AI product courses teach you to talk about AI products. This one has you ship one, then make the product calls you only face once something is actually running.

Every class is live, capped for discussion, and led by practitioners who have led enterprise AI and transformation programs.

2

Days, live and instructor-led

8

Modules from blank page to deployed app

1

Working application you leave holding

10

PDUs toward renewal

WHAT'S INCLUDED

10 hours live

2 days of instructor-led virtual classroom — not recordings.

Certification

Certified AI Product Manager™, issued through Accredible.

10 PDUs

Credit toward PMI and Scrum Alliance renewal requirements.

Post-class coaching

One-to-one executive coaching sessions after the cohort ends.

Digital workbook

The 2026 courseware, yours to keep and annotate.

AI prompt library

Reusable prompt patterns you can run the week after class.

Case studies

Real-world scenarios from organizations already doing this.

Free reschedule

Miss a session and join the next cohort at no extra cost.

Hands-on, not lecture. The class runs on activities, small-group discussion, role-play, and a running case study — including 4 AI activities where you write prompts, critique the output, and edit it into something a real team could use.

02 · WHY THIS CERTIFICATION, NOW

A working prototype beats a perfect requirements doc

Product managers have spent years describing software to the people who build it. That gap has narrowed sharply — a PM can now stand up a working version themselves in a day. This course exists to make that a habit, because the fastest way to settle an argument about a feature is to put the feature in front of people.

WHERE THIS TRAINING LANDS

Agile36 has delivered this course into:

- ✓ Financial services and insurance
- ✓ Healthcare and life sciences
- ✓ Government and public sector
- ✓ Telecom and media
- ✓ Retail and logistics
- ✓ Higher education

03 · DELIVERY MODE

- ✓ Live virtual classroom delivered remotely worldwide, over 2 days
- ✓ Taught by practitioners who have led enterprise AI and transformation programs, never contractors reading slides
- ✓ Cohorts kept small enough for real discussion and Q&A
- ✓ Open to attendees anywhere — weekday and weekend cohorts across US time zones, with private cohorts timed to your region

PREREQUISITES

- ✓ None. No engineering background is required.
- ✓ Bring a product idea you would genuinely like to exist.
- ✓ A laptop — you will be building on it.

04 · WHAT YOU'LL BE ABLE TO DO

Outcomes you can point to on Monday morning

Ship it

- ✓ Take an idea from blank page to a deployed, working application
- ✓ Stand up data, authentication, and state without an engineer
- ✓ Put AI into a product where it genuinely helps
- ✓ Deploy live and share a working link

Decide it

- ✓ Scope an idea down to a first version that can actually finish
- ✓ Cut scope with the build in front of you, not a document
- ✓ Decide what is good enough to release
- ✓ Trade speed against reliability deliberately

Take it back

- ✓ Prototype before you write a spec
- ✓ Brief engineering with a working thing rather than a document
- ✓ Apply the same loop to your real roadmap
- ✓ Know what AI in a product costs to run

AI-augmented product work NEW

- ✓ Take an idea to a **deployed app** without an engineering team
- ✓ Decide where AI **belongs in a product** and where it is decoration
- ✓ Handle **failure and cost** when a model sits in your critical path
- ✓ Cut scope against a **running build** rather than a document
- ✓ Brief engineering with a **working prototype** instead of a spec

05 · WHO SHOULD ATTEND

Product Managers

Wanting to build, not just spec.

Product Owners

Prototyping before a sprint.

Founders

Shipping a first version alone.

Business Analysts

Moving into product.

Programme Managers

Validating ideas quickly.

Designers

Taking a concept to working code.

Consultants

Building client prototypes.

Marketers

Standing up their own tools.

Certification. No exam. You leave with a deployed application, a shareable link, and a certificate of completion.

06 · COURSE CURRICULUM

8 modules, 2 days

The official 2026 module structure.

01 From idea to a shippable product

- Choose an idea small enough to finish
- Define the one job it does
- Scope to a first working version

02 Build the first working version

- Stand up the app
- Get something on screen fast
- Iterate against real use

03 Data, auth, and the parts that make it an app

- Persist real data
- Add sign-in
- Handle state and errors

04 Put AI in the product

- Choose where AI genuinely helps
- Wire the model into the product
- Handle failure and cost

05 Finish and deploy

- Close the gaps that block release
- Deploy it live
- Share a working link

06 Product calls you only make when you are building

- Cut scope with the build in front of you
- Decide what is good enough
- Trade speed against reliability

07 Demo the live app

- Show the working product
- Take questions on real behaviour
- Capture what you would build next

08 What you take back to work

- Apply the loop to your real roadmap
- Prototype before you spec
- Change how you brief engineering

07 · AI IN THIS COURSE

You leave with a live application

This is a building course. By the end of day two your product is deployed and you are demoing it to the room from a link.

Scope to something finishable **MODULE 1**

Pick an idea and cut it down to the one job it does — the single hardest product skill, practised before any code exists.

Put AI in the product **MODULE 4**

Decide where AI genuinely improves the product rather than decorating it, wire the model in, and handle failure and cost.

Finish and deploy **MODULE 5**

Close the gaps that block release and get the thing live on a link you can share.

Demo the live app **MODULE 7**

Show the working product, take questions about real behaviour, and capture what you would build next.

PROMPTING TECHNIQUES YOU'LL TAKE AWAY

- Take an idea to a **deployed app** without an engineering team
- Decide where AI **belongs in a product** and where it is decoration
- Handle **failure and cost** when a model sits in your critical path
- Cut scope against a **running build** rather than a document
- Brief engineering with a **working prototype** instead of a spec

RESPONSIBLE AI

A full topic, not a disclaimer. You'll work through common AI risks and the three aspects of responsible use:

- ✓ **Trustworthy AI** — reliable enough to base a decision on
- ✓ **Explainable AI** — you can say why it produced that
- ✓ **Human-centric AI** — the person stays accountable

08 · YOUR INSTRUCTORS

Taught by practising SPCs

Deadra Stevenson

CEO & Founder · SPC®

15+ years leading large-scale change and 30+ Lean-Agile transformations for Fortune and enterprise organizations. Pairs deep SAFe expertise with practical AI transformation guidance.

Marcus Ball

Enterprise Agile Coach · SPC®

Specializes in SAFe certification training and transformation coaching, helping teams improve flow, alignment, and the value they actually deliver.

Joe Puoci

Enterprise Trainer · SPC®

Delivers live virtual SAFe courses across the portfolio with a focus on real-world scenarios and skills learners can use the week after class.

Martina Svoboda

Enterprise Agile Coach · SPC®

Learner-centered facilitation spanning Agile transformation, organizational development, and change leadership.

ENROLL

\$400 ~~\$800~~ per seat, everything included

Weekday and weekend cohorts running throughout the year. Groups of five or more save 20%; private cohorts can be scheduled around your PI calendar.

ABOUT AGILE36

Agile36 is a transformation and technology enablement firm helping organizations accelerate performance, modernize operations, and build the capabilities required to compete in the digital era. For more than a decade we have partnered with Fortune 100 and Fortune 500 companies, government agencies, and universities to guide large-scale change.

This course is Agile36's own programme, built and delivered by our practitioners — hands-on, practical training that helps leaders adopt new ways of working and produce measurable results.
