COURSEWARE

\$400

PER SEAT

NEW IN THIS RELEASE

The whole lifecycle

Twelve modules from planning and scheduling through to future trends, not a single AI overview.

Ethics as a module

Module 11 covers confidentiality, bias, and transparency on real client work.

Traditional and Agile

Module 10 applies the same practices inside Agile and Scrum delivery.

AT A GLANCE

Course version	2026
Format	Live online
Duration	2 days · 10 hours
Credits	10 PDUs
Assessment	No exam
Credential	Generative AI for Project Managers™, issued through Accredible
Prerequisites	None
Investment	\$400 \$800

Training a team?

20% off any group of five or more, plus private cohorts scheduled around your PI calendar. Email d.stevenson@agile36.com.

★★★★★ 4.9 / 5

Rated by learners on Google. Agile36 has trained professionals at Fortune 100 and Fortune 500 companies, government agencies, and universities for more than a decade.

WHAT CHANGED IN VERSION 2026

Built around PM artefacts

Every module produces something a PM already owns: a plan, a register, a forecast, an update.

Tool-agnostic

Module 8 covers integrating AI into whatever project toolchain you already run.

An adoption plan

The final module turns the course into a plan for your own practice.

01 · PROGRAM OVERVIEW

AI applied to the job a PM actually does

This is generative AI taken through the whole project lifecycle rather than introduced in the abstract. Twelve modules covering planning and scheduling, team collaboration, risk, budgeting, stakeholder communication, decision making, tooling, quality, and Agile practices.

Module 11 is a full module on ethics — confidentiality of project and client data, bias in AI-supported decisions, and being transparent with your team about how the work was produced. The course closes on an adoption plan for your own practice.

THE AGILE36 DIFFERENCE

Built by practising project leaders, so every module lands on something a PM does every week: a schedule, a risk register, a status update, a budget forecast.

Every class is live, capped for discussion, and led by practitioners who have led enterprise AI and transformation programs.

2

Days, live and instructor-led

12

Modules across the project lifecycle

1

Full module on ethics, bias, and confidentiality

10

PDUs toward renewal

WHAT'S INCLUDED

10 hours live

2 days of instructor-led virtual classroom — not recordings.

Certification

Generative AI for Project Managers™, issued through Accredible.

10 PDUs

Credit toward PMI and Scrum Alliance renewal requirements.

Post-class coaching

One-to-one executive coaching sessions after the cohort ends.

Digital workbook

The 2026 courseware, yours to keep and annotate.

AI prompt library

Reusable prompt patterns you can run the week after class.

Case studies

Real-world scenarios from organizations already doing this.

Free reschedule

Miss a session and join the next cohort at no extra cost.

Hands-on, not lecture. The class runs on activities, small-group discussion, role-play, and a running case study — including 4 AI activities where you write prompts, critique the output, and edit it into something a real team could use.

02 · WHY THIS CERTIFICATION, NOW

Project managers were handed AI without a method

Most PMs are now expected to use AI and given no guidance on where it helps, where it quietly fabricates, or what may safely be pasted into it. This course supplies the method: which artefacts to rebuild with AI, how to test what comes back, and how to be straight with clients about it.

WHERE THIS TRAINING LANDS

Agile36 has delivered this course into:

- ✓ Financial services and insurance
- ✓ Healthcare and life sciences
- ✓ Government and public sector
- ✓ Telecom and media
- ✓ Retail and logistics
- ✓ Higher education

03 · DELIVERY MODE

- ✓ Live virtual classroom delivered remotely worldwide, over 2 days
- ✓ Taught by practitioners who have led enterprise AI and transformation programs, never contractors reading slides
- ✓ Cohorts kept small enough for real discussion and Q&A
- ✓ Open to attendees anywhere — weekday and weekend cohorts across US time zones, with private cohorts timed to your region

PREREQUISITES

- ✓ None. The course is open to all attendees.
- ✓ Project management experience helps you apply it faster.
- ✓ No prior AI experience is assumed.

04 · WHAT YOU'LL BE ABLE TO DO

Outcomes you can point to on Monday morning

Plan and forecast

- ✓ Draft plans, work breakdowns, and schedules with AI support
- ✓ Model costs and explain budget variance
- ✓ Surface risks a register missed and draft mitigations
- ✓ Structure options and trade-offs for a real decision

Communicate

- ✓ Tailor status updates by audience without rewriting from scratch
- ✓ Summarize meetings into tracked actions
- ✓ Prepare for escalation and difficult conversations
- ✓ Keep stakeholders current with far less overhead

Run it responsibly

- ✓ Handle project data confidentially when using AI tools
- ✓ Recognize bias and fairness risks in AI-supported decisions
- ✓ Be transparent with your team and client about AI use
- ✓ Build an adoption plan for your own practice

AI-augmented product work NEW

- ✓ Draft **plans, WBS, and schedules** then test them for what is missing
- ✓ Rebuild a **risk register** with risks the team had not named
- ✓ Produce **budget forecasts and variance** explanations that hold up
- ✓ Tailor **stakeholder communication** by audience in minutes
- ✓ Apply AI inside **Agile and Scrum** practices as well as traditional delivery

05 · WHO SHOULD ATTEND

Project Managers

Running delivery day to day.

Programme Managers

Coordinating across projects.

PMO Leads

Setting practice and standards.

Scrum Masters

Bridging Agile and traditional.

Delivery Managers

Accountable for schedule.

Business Analysts

Supporting planning and risk.

Product Owners

Managing scope and stakeholders.

Team Leads

Reporting up and out.

Certification. No exam. You leave with the Generative AI for Project Managers™ certification, issued through Accredible, 10 PDUs, and a prompt library covering every stage of the project lifecycle.

06 · COURSE CURRICULUM

12 modules, 2 days

The official 2026 module structure.

01 Introduction to Generative AI for Project Management

- What generative AI is and is not
- Where it fits a project lifecycle
- Setting expectations with your team

02 AI in Project Planning and Scheduling

- Drafting plans and work breakdowns
- Estimating and schedule modelling
- Testing a plan for gaps

03 Enhancing Team Collaboration with AI

- Meeting summaries and action tracking
- Reducing coordination overhead
- Keeping the team in the loop

04 AI for Risk Management and Mitigation

- Surfacing risks a register missed
- Assessing likelihood and impact
- Drafting mitigation plans

05 Leveraging AI for Project Budgeting

- Cost modelling and forecasting
- Variance analysis
- Explaining budget movement

06 AI in Stakeholder Communication

- Tailoring updates by audience
- Drafting status and escalation
- Preparing for difficult conversations

07 Using AI for Decision Making

- Structuring options and trade-offs
- Testing assumptions
- Documenting the rationale

08 Integrating AI into Project Management Tools

- Working with your existing toolchain
- Automating repetitive updates
- Keeping a single source of truth

09 Optimizing Project Quality with AI

- Quality planning and checks
- Reviewing deliverables
- Catching defects earlier

10 AI in Agile and Scrum Practices

- Backlog and story support
- Retrospective and review input
- Flow and velocity analysis

11 Ethical Considerations in AI Implementation

- Data handling and confidentiality
- Bias and fairness in project decisions
- Transparency with your team and client

12 Future Trends and AI Evolution in Project Management

- Where the tooling is heading
- Preparing your practice
- Building an adoption plan

07 · AI IN THIS COURSE

Twelve modules, one project lifecycle

The whole course is AI applied to project work. Each module takes one thing a project manager does every week and rebuilds it with generative AI in the loop.

Plan and schedule **MODULE 2**

Draft a work breakdown and schedule with AI, then stress-test it for the gaps a confident plan usually hides.

Risk register, rebuilt **MODULE 4**

Use AI to surface risks your register missed, assess likelihood and impact, and draft mitigations worth reviewing.

Budget and variance **MODULE 5**

Model project costs, forecast, and produce a variance explanation a sponsor will actually read.

Stakeholder updates **MODULE 6**

Tailor the same project truth to three different audiences without writing it three times.

PROMPTING TECHNIQUES YOU'LL TAKE AWAY

- Draft **plans, WBS, and schedules** then test them for what is missing
- Rebuild a **risk register** with risks the team had not named
- Produce **budget forecasts and variance** explanations that hold up
- Tailor **stakeholder communication** by audience in minutes
- Apply AI inside **Agile and Scrum** practices as well as traditional delivery

RESPONSIBLE AI

Module 11 is a full module on the ethics of using AI on client and project data:

- ✓ **Confidentiality** — what project data should never reach a model
- ✓ **Bias and fairness** — where AI-supported decisions go wrong
- ✓ **Transparency** — telling your team and client how you used it

08 · YOUR INSTRUCTORS

Taught by practising SPCs

Deadra Stevenson

CEO & Founder · SPC®

15+ years leading large-scale change and 30+ Lean-Agile transformations for Fortune and enterprise organizations. Pairs deep SAFe expertise with practical AI transformation guidance.

Marcus Ball

Enterprise Agile Coach · SPC®

Specializes in SAFe certification training and transformation coaching, helping teams improve flow, alignment, and the value they actually deliver.

Joe Puoci

Enterprise Trainer · SPC®

Delivers live virtual SAFe courses across the portfolio with a focus on real-world scenarios and skills learners can use the week after class.

Martina Svoboda

Enterprise Agile Coach · SPC®

Learner-centered facilitation spanning Agile transformation, organizational development, and change leadership.

ENROLL

\$400 ~~\$800~~ per seat, everything included

Weekday and weekend cohorts running throughout the year. Groups of five or more save 20%; private cohorts can be scheduled around your PI calendar.

agile36.com/courses/generative-ai-project-managers

ABOUT AGILE36

Agile36 is a transformation and technology enablement firm helping organizations accelerate performance, modernize operations, and build the capabilities required to compete in the digital era. For more than a decade we have partnered with Fortune 100 and Fortune 500 companies, government agencies, and universities to guide large-scale change.

This course is Agile36's own programme, built and delivered by our practitioners — hands-on, practical training that helps leaders adopt new ways of working and produce measurable results.
