

COURSE BROCHURE · VERSION 2026

# No-Code AI Agents & Automation™

Agents on day one, a working app on day two

2 days

LIVE ONLINE

10 hrs

PDUS & SEUS

Included

COURSEWARE

\$400

PER SEAT

## NEW IN THIS RELEASE

### Day two, you build an app

The final day is spent building a working application end to end — you leave with it running.

### Real tools, current versions

Grok, Claude, Claude Code, Codex, and n8n — the stack people are actually shipping agents on.

### Human-in-the-loop by design

Module 5 is about deciding what an agent does alone and what waits for a person.

## Training a team?

25% off any group of five or more, plus private cohorts scheduled around your PI calendar. Email [d.stevenson@agile36.com](mailto:d.stevenson@agile36.com).

## ★★★★★ 4.9 / 5

Rated by learners on Google. Agile36 has trained professionals at Fortune 100 and Fortune 500 companies, government agencies, and universities for more than a decade.

## WHAT CHANGED IN VERSION 2026

## No coding prerequisite

The course assumes no programming background and gets you to working agents anyway.

## Your process, not a sample

Bring a real business process; the workflows you build are ones you can keep using.

## Beyond single prompts

Multi-step and multi-agent workflows, with tools, data, and approval points.

## 01 · PROGRAM OVERVIEW

# Agents that do the work, built by people who don't code

This is a two-day build class. You create AI agents that reason through tasks, use tools, read your documents and data, and complete work across the applications your business already runs on — without writing code.

Day one is agents: designing them in Grok and Claude, connecting them to your tools and data, and automating multi-step workflows in n8n. Day two is app building — you use Claude Code and Codex to take a real requirement all the way to running software, and you leave with the application you built. Throughout, the question that matters most in practice: deciding what an agent may do on its own, and where a human stays in the loop.

## THE AGILE36 DIFFERENCE

This is a build class, not a demo. You leave with agents running against your own business processes, built in Grok, Claude, Claude Code, Codex, and n8n.

Every class is live, capped for discussion, and led by practitioners who have led enterprise AI and transformation programs.

2

Days, live and instructor-led

1

Working app, built by you on  
day two

5

Platforms: Grok, Claude, Claude  
Code, Codex, and n8n

10

PDUs toward renewal

## WHAT'S INCLUDED

### 10 hours live

2 days of instructor-led  
virtual classroom — not  
recordings.

### Certification

AI Agents and  
Automation™.

### 10 PDUs

Credit toward PMI and  
Scrum Alliance renewal  
requirements.

### Post-class coaching

One-to-one executive  
coaching sessions after the  
cohort ends.

### Digital workbook

The 2026 courseware,  
yours to keep and  
annotate.

### AI prompt library

Reusable prompt patterns  
you can run the week after  
class.

### Case studies

Real-world scenarios from  
organizations already doing  
this.

### Free reschedule

Miss a session and join the  
next cohort at no extra  
cost.

**Hands-on, not lecture.** The class runs on activities, small-group discussion, role-play, and a running case study — including 4 AI activities where you write prompts, critique the output, and edit it into something a real team could use.

**02 · WHY THIS CERTIFICATION, NOW**

## The bottleneck is no longer knowing how to code

Most of the work worth automating in a business is not hard software — it is repetitive, multi-step, and spread across five applications nobody wants to integrate. Agent tooling has closed that gap for non-developers. This course is about crossing it deliberately, with the approval points and escalation paths that keep an automated process trustworthy.

**WHERE THIS TRAINING LANDS**

Agile36 has delivered this course into:

- ✓ Financial services and insurance
- ✓ Healthcare and life sciences
- ✓ Government and public sector
- ✓ Telecom and media
- ✓ Retail and logistics
- ✓ Higher education

**03 · DELIVERY MODE**

- ✓ Live virtual classroom delivered remotely worldwide, over 2 days
- ✓ Taught by practitioners who have led enterprise AI and transformation programs, never contractors reading slides
- ✓ Cohorts kept small enough for real discussion and Q&A
- ✓ Open to attendees anywhere — weekday and weekend cohorts across US time zones, with private cohorts timed to your region

**PREREQUISITES**

- ✓ None. No programming background is required.
- ✓ Bring a real business process you would like to automate.
- ✓ A laptop and a willingness to build in the session.

## 04 · WHAT YOU'LL BE ABLE TO DO

## Outcomes you can point to on Monday morning

### Build

- ✓ Build AI agents that use tools, access information, and complete work on your behalf
- ✓ Use Grok and Claude to design and shape working AI agent solutions
- ✓ Apply Claude Code and Codex to build agents, apps, and automations
- ✓ Build and ship a working application on day two of class

### Automate

- ✓ Automate multi-step business workflows with n8n and AI agents
- ✓ Connect agents to apps, documents, APIs, and your own data
- ✓ Trigger actions across systems and hand work between them
- ✓ Redesign a business process around agents rather than around people

### Control

- ✓ Decide what an agent may do autonomously and what needs approval
- ✓ Design escalation, review, and multi-agent workflows
- ✓ Build reliability into agent workflows from the start
- ✓ Know when an agent is the wrong answer

### AI-augmented product work NEW

- ✓ Give an agent **instructions, tools, and context** that hold up in production
- ✓ Use **coding agents** to build software without being a developer
- ✓ Automate **multi-step workflows** across your real business systems
- ✓ Decide what runs **autonomously** and what needs a human approval
- ✓ Design **escalation and review** so an agent failing is not a crisis

## 05 · WHO SHOULD ATTEND

#### Operations Leads

Automating manual processes.

#### Product Managers

Prototyping without engineering.

#### Business Analysts

Turning process into workflow.

#### Scrum Masters

Removing team toil.

#### Consultants

Building client solutions fast.

#### Founders

Shipping without a dev team.

#### Marketers

Automating campaigns and content.

#### Support Leads

Deflecting repetitive work.

**Certification.** No exam. You earn the AI Agents and Automation™ certification, and leave with the agents and the app you built, plus the workflows you set up in class.

## 06 · COURSE CURRICULUM

## 5 modules, 2 days

The official 2026 module structure.

### 01 Build AI Agents Without Traditional Coding

- Create agents that reason through tasks
- Give agents instructions, tools, and context
- Complete work across applications without programming

### 02 Build with Grok and Claude

- Design agents and define instructions in Grok and Claude
- Work with business information and analyze problems
- Turn ideas into functioning AI solutions

### 03 Day Two — Build a Working App

- Use Claude Code and Codex to build a real application end to end
- Create integrations and automations without being a developer
- Go from requirement to running software inside the session
- Leave with the app you built, not a prototype you cannot run

### 04 Automate Workflows with n8n

- Connect AI agents to business applications
- Automate multi-step workflows in n8n
- Trigger actions across systems and hand off work

### 05 Tools, Data, and Human-in-the-Loop Design

- Connect agents to apps, documents, APIs, and data
- Decide what AI can do autonomously vs. with approval
- Design escalation, review, and multi-agent workflows
- Redesign business processes around AI agents and automation

## 07 · AI IN THIS COURSE

## Five modules, all of them hands-on

Every module ends with something running. You build in Grok and Claude, then with Claude Code and Codex, then wire it into your business systems with n8n.

### Your first working agent **MODULE 1**

Build an agent that reasons through a task, given instructions, tools, and context — and completes work across applications without a line of code.

### Design in Grok and Claude **MODULE 2**

Shape an agent around a real business problem: define its instructions, give it your information, and turn the idea into something that runs.

### Build an app on day two **MODULE 3 · DAY 2**

The last day of class is app building: you use Claude Code and Codex to take a real requirement all the way to running software, and you leave with the app.

### Wire it into the business **MODULE 4**

Connect agents to your applications in n8n, automate a multi-step workflow, and hand work between systems.

### PROMPTING TECHNIQUES YOU'LL TAKE AWAY

- Give an agent **instructions, tools, and context** that hold up in production
- Use **coding agents** to build software without being a developer
- Automate **multi-step workflows** across your real business systems
- Decide what runs **autonomously** and what needs a human approval
- Design **escalation and review** so an agent failing is not a crisis

### RESPONSIBLE AI

A full topic, not a disclaimer. You'll work through common AI risks and the three aspects of responsible use:

- ✓ **Trustworthy AI** — reliable enough to base a decision on
- ✓ **Explainable AI** — you can say why it produced that
- ✓ **Human-centric AI** — the person stays accountable

## 08 · YOUR INSTRUCTORS

# Taught by practising SPCs

**Deadra Stevenson**

**CEO & Founder · SPC®**

15+ years leading large-scale change and 30+ Lean-Agile transformations for Fortune and enterprise organizations. Pairs deep SAFe expertise with practical AI transformation guidance.

**Marcus Ball**

**Enterprise Agile Coach · SPC®**

Specializes in SAFe certification training and transformation coaching, helping teams improve flow, alignment, and the value they actually deliver.

**Joe Puoci**

**Enterprise Trainer · SPC®**

Delivers live virtual SAFe courses across the portfolio with a focus on real-world scenarios and skills learners can use the week after class.

**Martina Svoboda**

**Enterprise Agile Coach · SPC®**

Learner-centered facilitation spanning Agile transformation, organizational development, and change leadership.

## ENROLL

**\$400** ~~\$800~~ per seat, everything included

Weekday and weekend cohorts running throughout the year. Groups of five or more save 25%; private cohorts can be scheduled around your PI calendar.

## ABOUT AGILE36

Agile36 is a transformation and technology enablement firm helping organizations accelerate performance, modernize operations, and build the capabilities required to compete in the digital era. For more than a decade we have partnered with Fortune 100 and Fortune 500 companies, government agencies, and universities to guide large-scale change.

This course is Agile36's own programme, built and delivered by our practitioners — hands-on, practical training that helps leaders adopt new ways of working and produce measurable results.
