

2026 LIVE COHORT · NO CODING REQUIRED

No-Code AI Agents & Automation™ Certification Training

Build AI-powered automation without programming — master intelligent agents, workflows, and business productivity.

2 days live virtual 25+ hands-on automations 2,800+ professionals trained 4.9★ average rating

COURSE OVERVIEW

The **No-Code AI Agents & Automation™** certification teaches professionals to build AI-powered automation without writing code. In this intensive 2-day program, you will create intelligent agents, automate multi-step workflows, and integrate leading AI models into everyday business processes.

Learn to connect hundreds of apps and services, automate repetitive digital work, and deploy practical automations you can use immediately — using visual builders on platforms like **n8n**, **Make.com**, and **Langflow**.

n8n

Make.com

Langflow

ChatGPT API

Claude API

WHAT YOU'LL LEARN

- ✓ Build AI agents and automation workflows without coding
- ✓ Master n8n, Make.com, and Langflow platforms
- ✓ Create 25+ practical business automations
- ✓ Integrate ChatGPT and Claude APIs into workflows
- ✓ Automate lead qualification and email outreach
- ✓ Build content generation and data processing pipelines
- ✓ Apply responsible AI practices for business use
- ✓ Deploy automations that run autonomously across your stack
