

COURSE BROCHURE · VERSION 2026

Certified GenAI Practitioner

Generative AI foundations that stick

1 day

LIVE ONLINE

8 hrs

PDUS & SEUS

Included

COURSEWARE

\$299

PER SEAT

NEW IN THIS RELEASE

One day, no prerequisites

The entry point to the whole AI track, with no technical background assumed.

A quarter on ethics

One of four modules is responsible implementation — bias, confidentiality, and verification.

You leave with prompts

The final module builds a personal prompt library against your own recurring work.

AT A GLANCE

Course version	2026
Format	Live online
Duration	1 day · 8 hours
Credits	8 PDUs
Assessment	Micro-credential, no exam
Membership	1 year SAFe Studio
Prerequisites	None
Investment	\$299 \$599

Training a team?

25% off any group of five or more, plus private cohorts scheduled around your PI calendar. Email d.stevenson@agile36.com.

★★★★★ 4.9 / 5

Rated by learners on Google. Agile36 has trained professionals at Fortune 100 and Fortune 500 companies, government agencies, and universities for more than a decade.

WHAT CHANGED IN VERSION 2026

Plain language throughout
Models, tokens, and context explained for practitioners, not engineers.

Prompting taught as a skill
A full module on technique, iteration, and the mistakes that waste most people's time.

A thirty-day plan
The day ends with what you will actually do differently over the next month.

01 • PROGRAM OVERVIEW

The grounding everything else assumes you have

A single day covering what generative AI actually is, how to prompt it well, where it goes wrong, and how to apply it to your own work. It is the entry point to the Agile36 AI track and assumes no technical background whatsoever.

A full quarter of the course is responsible implementation — bias and fairness, confidentiality, hallucination and verification, and transparency about AI-assisted work. You leave with a personal prompt library and a thirty-day plan.

THE AGILE36 DIFFERENCE

Foundations taught for practitioners rather than engineers — every concept lands on something you do at work, and the ethics module is taught as judgment rather than compliance.

Every class is live, capped for discussion, and led by a certified SAFe® Practice Consultant.

1

Day, live and instructor-led

4

Modules from foundations to your own applications

25%

Of the course is responsible and ethical use

8

PDUs toward renewal

WHAT'S INCLUDED

8 hours live

1 day of instructor-led virtual classroom — not recordings.

Micro-credential

A Scaled Agile micro-credential badge on completion.

8 PDUs

Credit toward PMI and Scrum Alliance renewal requirements.

SAFe Studio

One-year membership plus SAFe Connect community access.

Digital workbook

The official 2026 courseware, yours to keep and annotate.

AI prompt library

Reusable prompt patterns you can run the week after class.

Practice test

Free practice exam and preparation materials.

Free reschedule

Miss a session and join the next cohort at no extra cost.

Hands-on, not lecture. The class runs on activities, small-group discussion, role-play, and a running case study — including 4 AI activities where you write prompts, critique the output, and edit it into something a real team could use.

02 · WHY THIS CERTIFICATION, NOW

Most people learned AI by guessing at it

Almost everyone is now using these tools and almost nobody was taught how. The result is predictable: weak prompts accepted at face value, confidential material pasted into public models, and fabricated answers passed on unchecked. One day of proper foundations removes most of that.

WHERE THIS TRAINING LANDS

Agile36 has delivered this course into:

- ✓ Financial services and insurance
- ✓ Healthcare and life sciences
- ✓ Government and public sector
- ✓ Telecom and media
- ✓ Retail and logistics
- ✓ Higher education

03 · DELIVERY MODE

- ✓ Live virtual classroom delivered remotely worldwide, over 1 day
- ✓ Taught by certified SAFe® Practice Consultants (SPCs), never contractors reading slides
- ✓ Cohorts kept small enough for real discussion and Q&A
- ✓ Open to attendees anywhere — weekday and weekend cohorts across US time zones, with private cohorts timed to your region

PREREQUISITES

- ✓ None. This is the entry point to the AI track.
- ✓ No technical background required.
- ✓ Useful for anyone whose work is being changed by AI.

04 · WHAT YOU'LL BE ABLE TO DO

Outcomes you can point to on Monday morning

Understand it

- ✓ Explain what generative AI is and how it differs from other AI
- ✓ Describe models, tokens, and context without jargon
- ✓ State plainly what these systems can and cannot do
- ✓ Recognize where the technology is heading

Use it well

- ✓ Write effective prompts using instruction, analysis, and chain-of-thought
- ✓ Give context and constraints that change the answer
- ✓ Iterate a weak answer into a usable one
- ✓ Avoid the prompting mistakes that waste most people's time

Use it safely

- ✓ Recognize bias, fairness, and representational harm
- ✓ Know what must never be pasted into a model
- ✓ Build verification habits against hallucination
- ✓ Be transparent about AI-assisted work

AI-augmented product work NEW

- ✓ Write prompts with **instruction, analysis, and chain-of-thought**
- ✓ Add **context and constraints** that materially change the answer
- ✓ **Iterate** a weak answer instead of accepting the first one
- ✓ Build **verification habits** against confident fabrication
- ✓ Know **when not to use it** — the most valuable judgment of all

05 · WHO SHOULD ATTEND

Anyone starting

The entry point to the AI track.

Team Members

Using AI tools daily already.

Managers

Setting expectations for a team.

Business Analysts

Applying AI to analysis work.

Scrum Masters

Coaching AI use on a team.

Marketers

Producing content responsibly.

Operations

Automating routine work.

Consultants

Advising clients on AI.

Certification. Assessment is practical rather than a timed exam. You leave with a certificate of completion and a personal prompt library.

06 · COURSE CURRICULUM

4 modules, 1 day

The official 2026 module structure.

01 Introduction to Generative AI

- What generative AI is and how it differs from other AI
- Models, tokens, and context in plain language
- What these systems can and cannot do
- Where the technology is heading

02 Prompt Engineering Fundamentals

- Anatomy of an effective prompt
- Instruction, analysis, and chain-of-thought techniques
- Giving context and constraints
- Iterating a prompt toward a usable answer
- Common prompting mistakes

03 AI Ethics and Responsible Implementation

- Bias, fairness, and representational harm
- Confidentiality and what not to paste in
- Hallucination and verification habits
- Transparency about AI-assisted work
- Organizational policy and your responsibility

04 Practical GenAI Applications

- Applying AI to your own recurring work
- Drafting, summarizing, and analyzing
- Building a personal prompt library
- Knowing when not to use it
- Planning your next thirty days

07 · AI IN THIS COURSE

Foundations you can actually build on

One day, four modules, and a personal prompt library at the end. Everything is taught against work you already do.

What it is, plainly **MODULE 1**

Models, tokens, and context explained without jargon — enough to reason about why a tool behaved the way it did.

Prompting properly **MODULE 2**

Instruction, analysis, and chain-of-thought techniques, and the constraints that turn a vague answer into a usable one.

Where it goes wrong **MODULE 3**

Bias, confidentiality, and hallucination — with verification habits rather than a policy document.

Your own prompt library **MODULE 4**

Apply the day to your recurring work and leave with prompts you will use, plus a thirty-day plan.

PROMPTING TECHNIQUES YOU'LL TAKE AWAY

- Write prompts with **instruction, analysis, and chain-of-thought**
- Add **context and constraints** that materially change the answer
- **Iterate** a weak answer instead of accepting the first one
- Build **verification habits** against confident fabrication
- Know **when not to use it** — the most valuable judgment of all

RESPONSIBLE AI

A quarter of the course is responsible use, taught as judgment rather than compliance:

- ✓ **Bias and fairness** — where outputs quietly disadvantage people
- ✓ **Confidentiality** — what must never be pasted into a model
- ✓ **Transparency** — being straight about AI-assisted work

08 · YOUR INSTRUCTORS

Taught by practising SPCs

Deadra Stevenson

CEO & Founder · SPC®

15+ years leading large-scale change and 30+ Lean-Agile transformations for Fortune and enterprise organizations. Pairs deep SAFe expertise with practical AI transformation guidance.

Marcus Ball

Enterprise Agile Coach · SPC®

Specializes in SAFe certification training and transformation coaching, helping teams improve flow, alignment, and the value they actually deliver.

Joe Puoci

Enterprise Trainer · SPC®

Delivers live virtual SAFe courses across the portfolio with a focus on real-world scenarios and skills learners can use the week after class.

Martina Svoboda

Enterprise Agile Coach · SPC®

Learner-centered facilitation spanning Agile transformation, organizational development, and change leadership.

ENROLL

\$299 ~~\$598~~ per seat, everything included

Weekday and weekend cohorts running throughout the year. Groups of five or more save 25%; private cohorts can be scheduled around your PI calendar.
