

COURSE BROCHURE · VERSION 2026

No-Code AI Agents & Automation™

Building working agents without writing code

2 days

LIVE ONLINE

10 hrs

PDUS & SEUS

Included

COURSEWARE

\$400

PER SEAT

NEW IN THIS RELEASE

You build, we don't demo

Every module ends with something running that you built in the session.

Real tools, current versions

Claude, Claude Code, Codex, and n8n — the stack people are actually shipping agents on.

Human-in-the-loop by design

Module 5 is about deciding what an agent does alone and what waits for a person.

AT A GLANCE

Course version	2026
Format	Live online
Duration	2 days · 10 hours
Credits	10 PDUs
Assessment	Micro-credential, no exam
Membership	1 year SAFe Studio
Prerequisites	None
Investment	\$400 \$800

Training a team?

25% off any group of five or more, plus private cohorts scheduled around your PI calendar. Email d.stevenson@agile36.com.

★★★★★ 4.9 / 5

Rated by learners on Google. Agile36 has trained professionals at Fortune 100 and Fortune 500 companies, government agencies, and universities for more than a decade.

WHAT CHANGED IN VERSION 2026

No coding prerequisite

The course assumes no programming background and gets you to working agents anyway.

Your process, not a sample

Bring a real business process; the workflows you build are ones you can keep using.

Beyond single prompts

Multi-step and multi-agent workflows, with tools, data, and approval points.

01 · PROGRAM OVERVIEW

Agents that do the work, built by people who don't code

This is a two-day build class. You create AI agents that reason through tasks, use tools, read your documents and data, and complete work across the applications your business already runs on — without writing code.

It moves from designing agents in Claude, to building apps and integrations with Claude Code and Codex, to automating multi-step workflows in n8n. The final module is the one that matters most in practice: deciding what an agent may do on its own, and where a human stays in the loop.

THE AGILE36 DIFFERENCE

This is a build class, not a demo. You leave with agents running against your own business processes, built in Claude, Claude Code, Codex, and n8n.

Every class is live, capped for discussion, and led by a certified SAFe® Practice Consultant.

2

Days, live and instructor-led

5

Modules, each ending in something that runs

4

Platforms: Claude, Claude Code, Codex, and n8n

10

PDU's toward renewal

WHAT'S INCLUDED

10 hours live

2 days of instructor-led virtual classroom — not recordings.

Micro-credential

A Scaled Agile micro-credential badge on completion.

10 PDU's

Credit toward PMI and Scrum Alliance renewal requirements.

SAFe Studio

One-year membership plus SAFe Connect community access.

Digital workbook

The official 2026 courseware, yours to keep and annotate.

AI prompt library

Reusable prompt patterns you can run the week after class.

Practice test

Free practice exam and preparation materials.

Free reschedule

Miss a session and join the next cohort at no extra cost.

Hands-on, not lecture. The class runs on activities, small-group discussion, role-play, and a running case study — including 4 AI activities where you write prompts, critique the output, and edit it into something a real team could use.

02 · WHY THIS CERTIFICATION, NOW

The bottleneck is no longer knowing how to code

Most of the work worth automating in a business is not hard software — it is repetitive, multi-step, and spread across five applications nobody wants to integrate. Agent tooling has closed that gap for non-developers. This course is about crossing it deliberately, with the approval points and escalation paths that keep an automated process trustworthy.

WHERE THIS TRAINING LANDS

Agile36 has delivered this course into:

- ✓ Financial services and insurance
- ✓ Healthcare and life sciences
- ✓ Government and public sector
- ✓ Telecom and media
- ✓ Retail and logistics
- ✓ Higher education

03 · DELIVERY MODE

- ✓ Live virtual classroom delivered remotely worldwide, over 2 days
- ✓ Taught by certified SAFe® Practice Consultants (SPCs), never contractors reading slides
- ✓ Cohorts kept small enough for real discussion and Q&A
- ✓ Open to attendees anywhere — weekday and weekend cohorts across US time zones, with private cohorts timed to your region

PREREQUISITES

- ✓ None. No programming background is required.
- ✓ Bring a real business process you would like to automate.
- ✓ A laptop and a willingness to build in the session.

04 · WHAT YOU'LL BE ABLE TO DO

Outcomes you can point to on Monday morning

Build

- ✓ Build AI agents that use tools, access information, and complete work on your behalf
- ✓ Use Claude to design and shape working AI agent solutions
- ✓ Apply Claude Code and Codex to build agents, apps, and automations
- ✓ Turn requirements into working software with AI assistance

Automate

- ✓ Automate multi-step business workflows with n8n and AI agents
- ✓ Connect agents to apps, documents, APIs, and your own data
- ✓ Trigger actions across systems and hand work between them
- ✓ Redesign a business process around agents rather than around people

Control

- ✓ Decide what an agent may do autonomously and what needs approval
- ✓ Design escalation, review, and multi-agent workflows
- ✓ Build reliability into agent workflows from the start
- ✓ Know when an agent is the wrong answer

AI-augmented product work NEW

- ✓ Give an agent **instructions, tools, and context** that hold up in production
- ✓ Use **coding agents** to build software without being a developer
- ✓ Automate **multi-step workflows** across your real business systems
- ✓ Decide what runs **autonomously** and what needs a human approval
- ✓ Design **escalation and review** so an agent failing is not a crisis

05 · WHO SHOULD ATTEND

Operations Leads

Automating manual processes.

Product Managers

Prototyping without engineering.

Business Analysts

Turning process into workflow.

Scrum Masters

Removing team toil.

Consultants

Building client solutions fast.

Founders

Shipping without a dev team.

Marketers

Automating campaigns and content.

Support Leads

Deflecting repetitive work.

Certification. No exam. You leave with working agents and a certificate of completion, plus the workflows you built in class.

06 · COURSE CURRICULUM

5 modules, 2 days

The official 2026 module structure.

01 Build AI Agents Without Traditional Coding

- Create agents that reason through tasks
- Give agents instructions, tools, and context
- Complete work across applications without programming

02 Build with Claude

- Design agents and define instructions in Claude
- Work with business information and analyze problems
- Turn ideas into functioning AI solutions

03 Build with Claude Code and Codex

- Use AI coding agents to build applications and agents
- Create integrations and automations without being a developer
- Turn requirements into working software with AI assistance

04 Automate Workflows with n8n

- Connect AI agents to business applications
- Automate multi-step workflows in n8n
- Trigger actions across systems and hand off work

05 Tools, Data, and Human-in-the-Loop Design

- Connect agents to apps, documents, APIs, and data
- Decide what AI can do autonomously vs. with approval
- Design escalation, review, and multi-agent workflows
- Redesign business processes around AI agents and automation

07 · AI IN THIS COURSE

Five modules, all of them hands-on

Every module ends with something running. You build in Claude, then with Claude Code and Codex, then wire it into your business systems with n8n.

Your first working agent **MODULE 1**

Build an agent that reasons through a task, given instructions, tools, and context — and completes work across applications without a line of code.

Design in Claude **MODULE 2**

Shape an agent around a real business problem: define its instructions, give it your information, and turn the idea into something that runs.

Build with coding agents **MODULE 3**

Use Claude Code and Codex to produce integrations and automations you could not have written yourself.

Wire it into the business **MODULE 4**

Connect agents to your applications in n8n, automate a multi-step workflow, and hand work between systems.

PROMPTING TECHNIQUES YOU'LL TAKE AWAY

- Give an agent **instructions, tools, and context** that hold up in production
- Use **coding agents** to build software without being a developer
- Automate **multi-step workflows** across your real business systems
- Decide what runs **autonomously** and what needs a human approval
- Design **escalation and review** so an agent failing is not a crisis

RESPONSIBLE AI

A full topic, not a disclaimer. You'll work through common AI risks and the three aspects of responsible use:

- ✓ **Trustworthy AI** — reliable enough to base a decision on
- ✓ **Explainable AI** — you can say why it produced that
- ✓ **Human-centric AI** — the person stays accountable

08 · YOUR INSTRUCTORS

Taught by practising SPCs

Deadra Stevenson

CEO & Founder · SPC®

15+ years leading large-scale change and 30+ Lean-Agile transformations for Fortune and enterprise organizations. Pairs deep SAFe expertise with practical AI transformation guidance.

Marcus Ball

Enterprise Agile Coach · SPC®

Specializes in SAFe certification training and transformation coaching, helping teams improve flow, alignment, and the value they actually deliver.

Joe Puoci

Enterprise Trainer · SPC®

Delivers live virtual SAFe courses across the portfolio with a focus on real-world scenarios and skills learners can use the week after class.

Martina Svoboda

Enterprise Agile Coach · SPC®

Learner-centered facilitation spanning Agile transformation, organizational development, and change leadership.

ENROLL

\$400 ~~\$800~~ per seat, everything included

Weekday and weekend cohorts running throughout the year. Groups of five or more save 25%; private cohorts can be scheduled around your PI calendar.
